SPACER VARIATIONS IN KEYBOARD

There are 3 types of buttons on the keyboard PCB.

- 1: Yellow buttons (from 2008)
- 2: White buttons.(from 2005 to 2008)
- 3: Blue buttons (before 2005)

The different button colours have different hight.

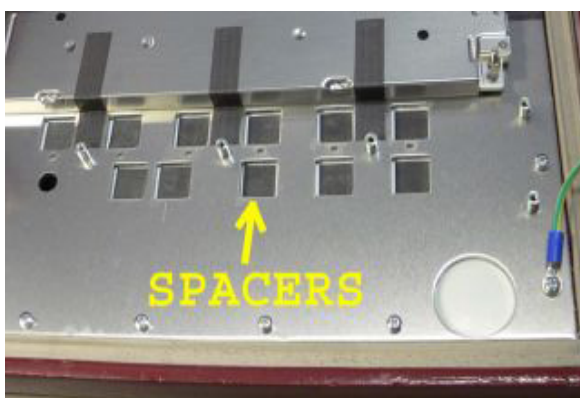

On keyboards with blue and with white colour there are spacers inserted in front of buttons.
(Between buttons and overlay of front.)

When replacing the keyboard you will receive a new keyboard with yellow buttons.

If replacing from keyboard with blue or white buttons:

Please remove the existing spacers before you install the new with yellow buttons.
